

Suite SecureSystem

Guide for organizers and participants

Package Contents (Suite)

You will find 2 files:

1. **Install_SecureOrg.exe** → install on a Windows PC (organization)
2. **SecureMobile.apk** → Android app for attendees

iOS Note: Due to Apple policy, we do not offer an iPhone/iPad player.

Package Contents (Manuals)

You will find 2 files:

1. **ISTRUZIONI-INSTRUCCIONES-INSTRUCTIONS_SECURE_ORG.docx** (organization)
2. **ISTRUZIONI-INSTRUCCIONES-INSTRUCTIONS_SECURE_MOBILE.docx** (participants)

Requirements

1. **PC organization:** Windows 10/11, printer, PDF reader.
2. **Participating smartphones:** Android 8+ (recommended). Turn on "unknown sources."

Installation (organization)

1.
 1. Extract the **.zip** to a secure folder (for future reinstallations).
 2. Run **Install_SecureOrg.exe** and complete the installation.
 3. Leave the **"Create desktop shortcut" option enabled**.

Installation (participants – Android)

1. Submit **SecureMobile.apk** and the **.mcg file** generated by your organization.
2. It also sends **ISTRUZIONI-INSTRUCCIONES-INSTRUCTIONS_SECURE_MOBILE.docx**.

3. The APK may be marked as an "unofficial source" — that's **normal**. It recommends that Google **crawl** you when asked.
4. The **.mcg** file is **locked until the day of the event**: this is normal.

Recommended flow (before the event)

1. Create the **rally .gpx track** with your favorite editor (TwoNav Land, BaseCamp, Orux/Orus, etc.) SECURE_ORG.docx.
2. Launch **SecureOrg** → **Upload** Track (select .gpx).
3. Enter the **effective date** (format dd-mm-yyyy, e.g. 07-05-2025).
4. Press **Save** to generate the **encrypted .mcg** file .
5. Create a **WhatsApp group** with participants to send apps, files, and communications.
6. Send to participants:
 1. **SecureMobile.apk**
 2. **.mcg** (cannot be opened before the event)
 3. **SECURE_MOBILE.docx**

Day of the event

During the meeting, make sure that everyone has installed the app and uploaded the .mcg file, and that it opens correctly on the appointed day.
